Education

CT University

Bachelor of Technology (B.Tech.) in Computer Science (Artificial Intelligence & Data Science)

Punjab, India

Expected June–July 2027

- **Academic Performance:** Cumulative GPA of 9.26 / 10.00.
- **Academic Excellence Award:** Secured Semester Ranks: 1st, 1st, 2nd, 2nd, 2nd, 1st, 1st

Experience

Data Engineering Intern

LunarTech AI

Jun. 2026 – Present

Texas, USA (REMOTE)

- Engineered scalable data pipelines that transformed **100,000+** global investor records into **44,600** normalized, CRM-ready entities using the Medallion Architecture, improving data quality, consistency, and downstream usability for fundraising operations.
- Designed investor intelligence workflows incorporating entity resolution, relevance scoring, and Apollo enrichment to support targeted outreach across AI, healthcare, deep-tech, med-tech, and venture capital ecosystems while reducing manual data preparation.

Data Analyst Intern

Soulracle Limited

Jun. 2026 – Present

Hong Kong SAR

- Conducted product analytics, customer journey mapping, and competitive market research across Hong Kong, Taiwan, and Mainland China, translating analytical findings into recommendations for product strategy and user experience.
- Contributed to the development and market research of **Renyo AI**, selected among the **Top 100 projects in Maker China**, supporting product analytics, competitive research, and AI product strategy.

Software Engineer Intern

Byteoski Developers

May 2025 – Aug. 2025

India

- Developed AI-powered SaaS applications using Django, Next.js, PostgreSQL, OpenAI APIs, and Celery, implementing scalable backend services, asynchronous task processing, and interactive analytics dashboards.
- Led technical development of *GrowOnReddit*, an AI-assisted Reddit marketing platform, contributing to product architecture, marketing analytics, and launch initiatives including Product Hunt and LinkedIn campaigns.

Publications

Volatility Dynamics of Asian Stock Markets: Evidence from the Hang Seng Index and Nikkei 225

Jul. 2026

- Working Paper, Zenodo. DOI: 10.5281/zenodo.18180779

Generalization Limits in Noisy Time Series Returns

Jul. 2026

- Working Paper, Zenodo. DOI: 10.5281/zenodo.18180884

Selected Projects

EcomSWOT — *Python, Django, OpenAI API, Shopify API, Poetry*

Live Link

- Built an LLM-powered sentiment analysis and feedback integration platform that parses customer Shopify reviews to dynamically output production-grade JSON SWOT (Strengths, Weaknesses, Opportunities, Threats) reports.

SmartExpense AI — *OpenCV, Tesseract OCR, Django REST Framework, Next.js, PostgreSQL*

Github Link

- Designed an enterprise-grade financial digitization pipeline using bilateral filtering and adaptive binarization to extract layout-mapped data from physical receipts, decreasing manual entries down to under 3 seconds.

Investor Intelligence Platform — *BigQuery, Python, Apollo API, CRM Workflows*

Github Link

- Created an end-to-end data pipeline managing high-volume entity resolution, automatic enrichment, and custom vector clustering for targeted venture and growth stage investment discovery.

Leadership & Service

Technical Coordinator, TechVerse Club

- Chaired and organized technical workshops, multi-disciplinary hackathons, and developmental bootcamps for 500+ university community students.

Class Representative, CSE Department

- Elected to coordinate academic communication pipelines, streamline scheduling, and represent feedback loop between 60+ peers and faculty.

Volunteer Web Developer, Mind HK & I Love People NGO

- Volunteered to develop, deploy, and maintain custom web application portals to digitize administrative activities for non-profit operations.

Technical Skills

Programming: Python, SQL, JavaScript

AI & Analytics: Machine Learning, NLP, Computer Vision, Time Series Analysis, LLM Applications

Data Engineering: BigQuery, PostgreSQL, ETL Pipelines, Tableau, Medallion Architecture

Frameworks & Tools: Django, Next.js, Git, GitHub, Celery, Vercel, Render, Poetry

Languages: English (Fluent), Hindi (Fluent), Punjabi (Fluent), Cantonese (Beginner)
